- Was there anything about it that was frustrating? Boring?
- How was the layout of the deck building screen?
- What is the important information about the cards you look for?
- Is filtering cards something that interests you? If so whats the most common filter you would use?
- Are you interested in more features involving the cards? Which ones would appeal to you?

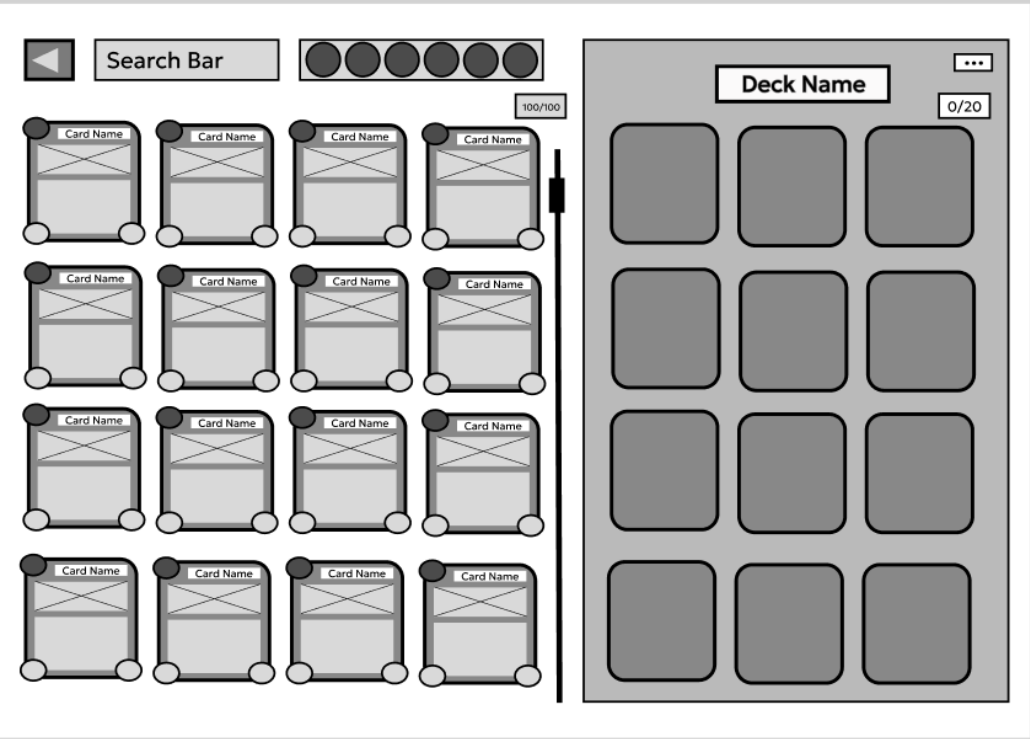
EMPATHY MAP

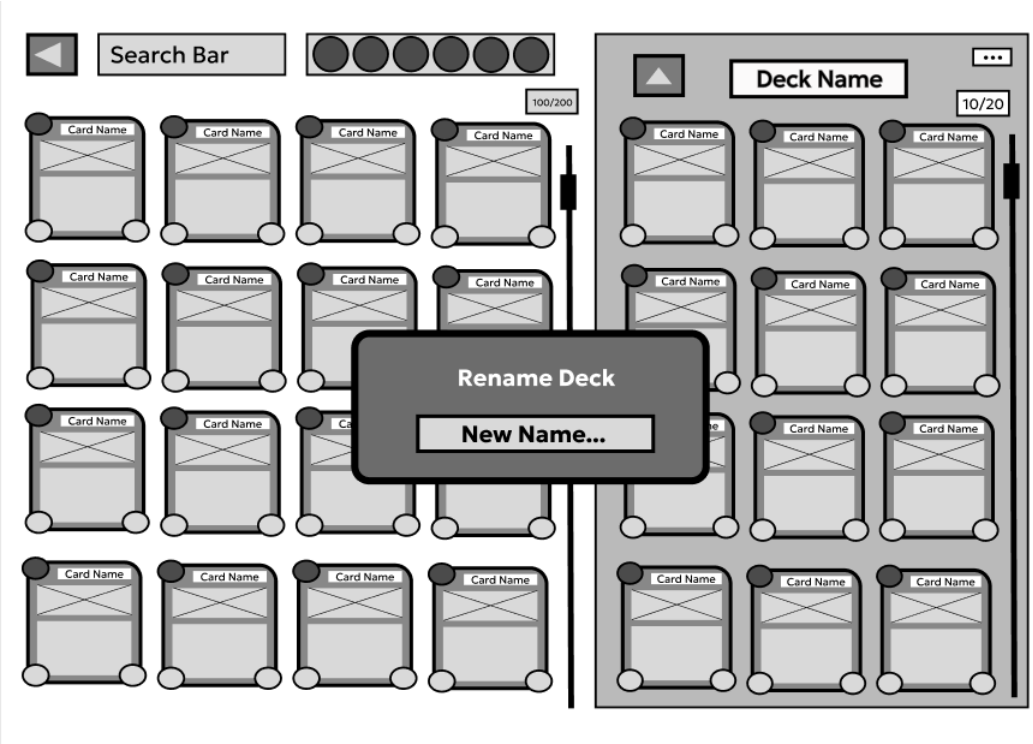
Play Tester: Julian D. Silva

- **Say**
    - Which cards are in deck
    - Cares about details of cards
        - The name of the card
        - Visual reference of card
        - What it does
        - Energy
        - Stats most important
    - Wants Visual reactions (animations)
    - When building decks, looks into balancing the deck
    - Uses the ability to swap through decks really easily
    - No visual indicator of how many cards I can have
    - Deck information should be saved

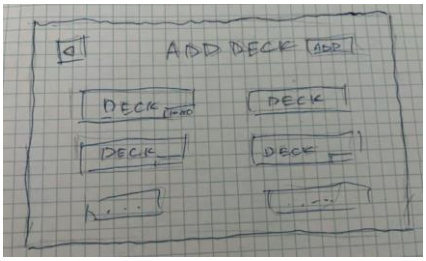
    - Uses a lot of filtering
        - Class of cards filter
        - Custom search
    - Card trading
        - With other players?
    - Prefers package system to getting cards
    - Preview of the deck
    - Customizing
    - Prefer clicking
    - Saving the deck / abandoning deck
    - Want to see the card details but multiple cards
- **Thinks**
    - Cared a lot more about good user experience
    - Would like nice visuals
- **Does**
    - First thing clicks deck
    - Starts adding cards
    - Realizes when cards arent continuing to add
    - Then Started to add more decks
- **Feels**
    - Sad when Deck didn’t save cards
    - Not pleased with the visuals of the deck and the cards

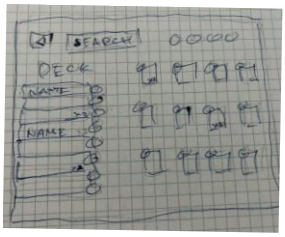
<u>Deck Building Wireframe Inspiration</u>

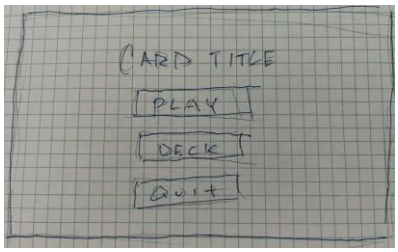




Prototype 1 - Good User experience







- **Goal:**
  - Give the user better user experience
  - Card Filtering
- **Quality of life features**
  - Saving cards / deck
  - Main menu
  - Screen for swapping decks
- **Know important info**
  - How many cards
